

2018 LEGISLATIVE SCORECARD

How did your lawmaker
vote on New Hampshire's
health and wellness in
2018?

Introduction

Promoting and preserving health and wellness is essential to keeping New Hampshire a great place to live, work, and raise a family. At New Futures, we recognize the importance of overall health to New Hampshire, so we advocate for the health of all Granite Staters.

New Futures supports state policy that keeps New Hampshire healthy by focusing on five separate policy areas: general health, alcohol and other drugs, early childhood, access to treatment, and children's behavioral health.

During the 2018 legislative session, many laws were passed that will benefit the health and wellness of the Granite State for years to come. This was due in great part to the unwavering advocacy of New Futures' partners and trained advocates.

As a nonpartisan, nonprofit organization, New Futures believes it is critical that Granite Staters have accurate information about their lawmakers' voting records on issues related to health and wellness in New Hampshire. To that end, we have compiled your lawmakers' record on some of the most critical votes in 2018. We urge you to use this legislative scorecard to further raise your voice to advocate for a stronger and healthier New Hampshire.

About the Legislative Scorecard

Purpose

This legislative scorecard is for educational purposes only, and not for ranking or endorsing any legislator. The bills selected address issues spanning New Futures five issue areas, all of which drastically affect New Hampshire's health and wellness. The priorities on which New Futures focuses efforts are decided by policy advisory committees, comprised of experts and leaders in each field. This tool is intended to inform New Hampshire residents about these policy priorities, and how their lawmakers actions shape those policies.

Method

The three bills ranked based on individual lawmakers votes represent New Futures three 2018 campaign priorities: Medicaid Expansion, Marijuana Legalization, and Childhood Lead Poisoning Prevention. The votes listed were taken as transcribed by the New Hampshire General Court (gencourt.state.nh.us).

For each bill, a vote which supported New Futures' position is indicated by a ★ and one which did not support New Futures' position is represented by a ✘. A blank score indicates that a legislator did not vote on that bill.

Ongoing Advocacy Priorities

New Futures' ongoing advocacy priorities represent important policy efforts made within our issue areas: health care, access to care, alcohol and other drugs, early childhood development, and children's behavioral health. The bills listed were identified as priorities by experts and advisers who recognize the importance of the policies for the health and wellness of the Granite State.

Many of these bills were voted upon by our Senators or House Representatives via voice vote and lack a roll call list of votes to hold individual legislators accountable. Still, each of these policies has a critical impact on New Hampshire's health and wellness, and we hope that the overall scoring of passage or failure will help to educate you and your lawmakers.

Outcomes in line with New Futures' position are indicated by a ★.

Alcohol and Other Drug Policy

SB 513: Establishing New Hampshire Recovery Month ★

NEW FUTURES SUPPORTED | BILL PASSED

This bill established September as New Hampshire Recovery Month. SB 513 will help New Hampshire support and honor those in recovery from addiction. The bill passed the Senate unanimously, passed the House with a voice vote, and was signed into law by the Governor.

CACR 21: Fully Fund the Alcohol Fund

NEW FUTURES SUPPORTED | BILL FAILED

New Futures strongly supports the full funding of New Hampshire's Alcohol Fund at 5 percent, with the profits from the state's sale of liquor going towards prevention, treatment, and recovery. The bill, which would have included this provision in the state's constitution, was voted 'inexpedient to legislate' in the New Hampshire Senate.

However, in 2018, thanks to the dedication of New Hampshire's hospitals and state officials to support the innovative prevention, treatment, and recovery programs made possible by a fully-funded Alcohol Fund, the hospitals made a commitment to fund the Alcohol Fund at 5 percent of profits despite the lack of CACR 21's passage.

SB 431: Non-Academic Surveys

NEW FUTURES SUPPORTED | BILL FAILED

SB 431 would have allowed schools and organizations to collect the data necessary to evaluate their progress and comply with federal prevention grants. The bill was voted 'inexpedient to legislate' in the New Hampshire Senate.

Access to Treatment Policy

SB 487: Behavioral Health Workforce ★

NEW FUTURES SUPPORTED | BILL PASSED

SB 487 established a statewide system of substance use disorder treatment programs, removing barriers to building New Hampshire's behavioral health workforce. The bill passed both the New Hampshire Senate and House of Representatives.

SB 549: Safe Plan of Care ★

NEW FUTURES SUPPORTED | BILL PASSED

SB 549 directs health care providers to help develop a safe plan of care for any child born exposed to drugs or alcohol, which will help reduce stigma and support healthy moms and babies. The bill passed both bodies of the New Hampshire legislature.

Early Childhood Policy

SB 592: Child Welfare and Protection Services ★

NEW FUTURES SUPPORTED | BILL PASSED

SB 592 will lead to an improved child protection system by increasing funding for voluntary and community-based protection services and parental assistance programs. These provisions will provide important supports for families and lead to safer New Hampshire children. The bill passed with tremendous support from state leaders in both bodies.

SB 570: Child Care Scholarship ★

NEW FUTURES SUPPORTED | BILL PASSED

SB 570 provides critical child care support to families seeking substance use treatment. This bill includes participation in a mental health or SUD treatment program under the work requirement for New Hampshire's child care scholarship program, making child care available to many families who are impacted by addiction. The bill was voted "ought to pass" by the New Hampshire legislature.

Health Policy

HB 1809: Balance Billing ★

NEW FUTURES SUPPORTED | BILL PASSED

HB 1809 protects consumers by prohibiting balance billing in certain situations by out-of-network providers, thus eliminating surprise bills after medical services are performed. The bill passed the House with strong support and unanimously passed the Senate.

HB 1418: Drug Price Transparency Commission ★

NEW FUTURES SUPPORTED | BILL PASSED

HB 1418, creates a commission to look at drug price transparency and rebates for pharmaceutical benefit managers. This bill will shine a light on the cost of prescription drugs, leading to increased transparency in our health care system. The bill passed both the New Hampshire House of Representatives and Senate on a voice vote.

Campaign Priorities

Three New Futures campaign priorities were achieved in the 2018 legislative session: the reauthorization of Medicaid Expansion, the defeat of marijuana legalization, and protections against childhood lead poisoning. New Futures' campaign advocacy requires the hard work of large coalitions to ensure the education of lawmakers and the public and eventual policy decisions made in line with health and wellness priorities.

SB 313: Medicaid Expansion Reauthorization ★

NEW FUTURES SUPPORTED | BILL PASSED

Medicaid Expansion is the single most important program to keep New Hampshire residents healthy. To date, it has helped over 130,000 Granite Staters gain access to health care. Additionally, the program has been instrumental in supporting the statewide Drug Court system and other substance use treatment programs. Medicaid Expansion supports a vibrant Granite State economy by bringing more than \$400 million in federal funding back to the state each year. Together, New Futures and partners placed thousands of calls, hosted a legislative breakfast featuring dozens of legislators, and held a Rally to Reauthorize #MedEx that drew hundreds of advocates to the State House to voice their support for Medicaid Expansion.

Passed by the Senate [Senate Vote #82], (Ought to Pass with Amendment 17-7)

Passed by the House [House Vote #176], (Ought to Pass with Amendment 222-125)

HB 656: Legalization of Marijuana ★

NEW FUTURES OPPOSED | BILL SENT TO INTERIM STUDY

The legalization of marijuana would be detrimental to our youth, pose threats to public health and public safety, and would threaten New Hampshire's quality of life. New Hampshire is in a unique position to wait and see what experiences other states have on the road to legalization. Thanks to strong advocacy from many partners, HB 656 was sent to interim study. Our lawmakers recognized that it was the wrong bill at the wrong time for New Hampshire.

Failed the House [House Vote #173], (Interim Study 153-135)

SB 247: Childhood Lead Poisoning Prevention ★

NEW FUTURES SUPPORTED | BILL PASSED

SB 247 takes important steps to protect children from hazardous lead poisoning. This bill requires blood testing for lead poisoning for 1- and 2-year-olds, lowers the action level for required intervention, and ensures that landlords and parents are informed when a child is found to be exposed to lead. SB 247 is now effective in the state of New Hampshire, helping to protect Granite State children from the dangers of lead poisoning. The bill passed both the Senate and House and was signed into law by Governor Sununu.

Passed by the House [House Vote #7], (Ought to Pass with Amendment 266-87)

Passed by the Senate [Senate Vote #26], (Concur 18-6)

Senate Votes

NOTE: HB 656, Marijuana Legalization, was sent to interim study in the NH House of Representatives, so no votes were cast in the Senate.
