

MARIJUANA POLICIES IN NH

THERAPEUTIC

This is about providing medical treatment with a doctor's supervision.

- Since 2013, NH law has allowed the therapeutic use of cannabis, also known as medical marijuana, for certain medical conditions.
- Five thousand Granite Staters live with a qualifying condition and currently have a therapeutic cannabis certification through their physician.
- There are 22 qualifying conditions in NH's therapeutic cannabis program including cancer, moderate to severe chronic pain, and post traumatic stress disorder.
- In NH, we currently have four therapeutic cannabis dispensaries located in different regions of the state.

DECRIMINALIZATION

This is about reducing arrests and social justice concerns.

- In 2017, NH decriminalized certain amounts of marijuana and some marijuana related products in order to address social justice concerns.
- Possession of up to 3/4 of an ounce of marijuana is now considered a civil offense and served with a fine instead of a criminal offense or jail time.
- An individual who receives a violation for marijuana possession will be charged \$100 for the first offense and \$300 for each subsequent offense.
- In NH, the fines collected from the violations go toward substance use disorder screening and prevention.

LEGALIZATION

This is about risking harm to our young people and quality of life.

- Complex public health and safety concerns, including the safety of our roads and availability of highly potent edible products, surround legalization.
- Legalizing marijuana would negatively impact the health and wellness of our workforce and families.
- The legalization of any substance opens the door to corporations who use harmful advertising aimed at young people to hook and secure lifelong users.
- Marijuana use during youth, when young brains are developing, can have long-term negative health effects.

THE FACTS ABOUT NEW HAMPSHIRE'S CURRENT MARIJUANA POLICIES

THERAPEUTIC CANNABIS CURRENTLY IN NH LAW

2013
